EVERGREEN POINT FLOATING BRIDGE

HAER WA-201

(Governor Albert D. Rosellini Bridge—Evergreen Point)

On SR 520 from Seattle, WA to Medina WA

Seattle

King County

Washington

## INDEX TO BLACK AND WHITE PHOTOGRAPHS

Jet Lowe, photographer, August 2010

WA-201-1	General view looking northwest showing central span of Floating Bridge in background. I-90 Bridge in foreground
WA-201-2	View looking north over Lake Washington of Floating Bridge, Madison Park location of highrise at foot of bridge on left
WA-201-3	Barely visible floating section looking north
WA-201-4	View looking northeast over Madison Park
WA-201-5	View north-northeast of Montlake Interchange and west approach at Marsh Island and Foster Island, showing Arboretum Viaduct at center foreground
WA-201-6	View east of Montlake Interchange at Marsh Island, left foreground. West approach crossing Marsh Island at left center
WA-201-7	Webster Point middle distance, left, view looking east from west end of the SR 520 Bridge Complex
WA-201-8	Perspective view looking southeast above University of Washington playing fields, Union Bay Natural Area at left foreground
WA-201-9	View east SR 520 Bridge, Huskie Football Stadium in foreground

Page 2

WA-201-10	View southwest over Lake Washington of SR 520 Bridge, Hunts Point lower left corner. Downtown Seattle center right.
WA-201-11	Aerial view looking south from above Magnuson Park
WA-201-12	Floating Bridge looking southeast from above Union Bay, showing Laurelhurst at left
WA-201-13	View southeast of SR 520 Bridge from over Laurelhurst
WA-201-14	Southwest view of SR 520 from above Hunts Points showing Medina and the east approach at left
WA-201-15	Aerial view looking west-northwest above eastern approach
WA-201-16	East side transition area and east approach with 84th Avenue northeast in foreground crossing SR 520
WA-201-17	West approach crossing Foster Island, and interchange ramps at Marsh Island, looking west
WA-201-18	Retractable center span looking northwest to University District and Webster Point at back right
WA-201-19	Retractable center span looking southeast
WA-201-20	Retractable center span looking southwest, showing control tower
WA-201-21	West end of floating span transitioning from floating to fixed via truss section of the west approach
WA-201-22	Floating survey barge and west approach roadway looking straight down
WA-201-23	Floating to fixed truss transition span of the west approach, looking south
WA-201-24	West approach truss transition span foreground looking east to retractable center span of the Floating Bridge
WA-201-25	Close view of floating span looking southeast
WA-201-26	Retractable span from south side looking north
WA-201-27	Fixed west approach and truss span looking west-northwest
WA-201-28	Fixed west approach span looking west

Page 3

WA-201-29	Foster Island and interchange ramps at Marsh Island looking west
WA-201-30	View looking northwest of through truss bridge connecting floating span and fixed west approach
WA-201-31	View east SR 520 Bridge, Montlake Cut and Montlake Bridge left foreground
WA-201-32	View south at interchange to Lake Washington Boulevard, Marsh Island in foreground, downtown Seattle in distance to right
WA-201-33	Portage Bay and SR 520/I-5 interchange at Roanoke west of Montlake and the SR 520 Floating Bridge complex, looking west to Lake Union, Queen Ann Hill, and the Olympic Mountain foothills in the distance
WA-201-34	View east with Montlake Boulevard Interchange in foreground
WA-201-35	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point
WA-201-36	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point
WA-201-37	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point
WA-201-38	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point
WA-201-39	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point
WA-201-40	Segment of panoramic view looking southward consisting of view 35-40, shot from the southernmost part of Laurelhurst at Webster Point

Page 4

WA-201-41	East approach through truss fixed transition span on left, floating on right, looking south
WA-201-42	Transfer span east end looking northwest
WA-201-43	Closer view of floating span at eastern end
WA-201-44	Detail view south of the floating section east end with closed and open cells
WA-201-45	View of control tower and center retractable span east end in closed position looking south
WA-201-46	Retractable span and control tower looking southwest
WA-201-47	Perspective view of retractable span, control tower, and catwalk bridge looking southeast
WA-201-48	West end of floating span transitioning from floating to fixed via truss section looking southeast, notice construction barge obscured by floating pier sections
WA-201-49	Detail transitional section western end looking south
WA-201-50	Oblique perspective north side of west approach transition span an western end of floating span
WA-201-51	Floating bridge to through truss to fixed column west approach span, looking southwest
WA-201-52	Perspective view of fixed west approach as it lands at Foster Island, looking southwest
WA-201-53	Detail of west approach through truss looking south
WA-201-54	West approach spans looking southeast
WA-201-55	View looking east-northeast main west approach span from Madison Park
WA-201-56	Western approach span shot from Madison Park at Laurel Terrace of the Edgewater Condominium Complex, stalled traffic at 3PM
WA-201-57	Interior of pontoon 2R, south cell showing anchor cable crossing to middle cell
WA-201-58	Anchor cable saddle detail view east from within pontoon 2R

Page 5

WA-201-59	General view from east side of Lake Washington at Medina looking west employing 480mm lens
WA-201-60	View west from 76th Avenue northeast bridge in Medina
WA-201-61	View east at Montlake Interchange of Arboretum ramps at west of the floating bridge. This approach section is elevated on piers above Union Bay and wetlands
WA-201-62	View southwest, transfer span hydraulic life. One of four
WA-201-63	View north, pontoon 2R interior, view from south cell into middle cell showing anchor cable
WA-201-64	View east, pontoon 2R, south cell pontoon interior, middle cell, anchor tension
WA-201-65	South cell 12, pontoon 2R, cable anchorage
WA-201-66	Pontoon 2R, cell 12 interior looking west
WA-201-67	View west of closed retractable transfer span of the floating section
WA-201-68	View west of open retractable transfer span
WA-201-69	View of open transfer span without people; horizontal glideroller #6
WA-201-70	Open transfer span, center glide east end
WA-201-71	Transfer span east end looking northwest
WA-201-72	End lock motor starter at draw span (transfer span)
WA-201-73	View west, open draw span, elevation and control tower
WA-201-74	View west at east high rise trestle, closed to traffic for annual inspection
WA-201-75	View northeast of east high rise trestle. Underside of the through truss and pontoon deck
WA-201-76	View northwest of east through trestle towards transition span
WA-201-77	Southeast view open draw span, end flaps
WA-201-78	Detail view of draw span roller guide, equalizer

Page 6

WA-201-79	Northwest view, utility building outside view and exterior control panels
WA-201-80	View west from shore, under east approach of the full bridge
WA-201-81	View southeast of east approach from shoreline dock
WA-201-82	View northwest of catwalk bridge crossing showing spiral staircases
WA-201-83	View east-southeast draw span and roller glide planes showing control tower third floor
WA-201-84	View east draw span showing control tower and barrier mechanism
WA-201-85	View northeast of control tower interior, control desk pinnacle
WA-201-86	View northwest from the control tower of the catwalk bridge crossing, showing the draw span in an up position, floating bridge and west approach
